2 Capturing a Screen Area
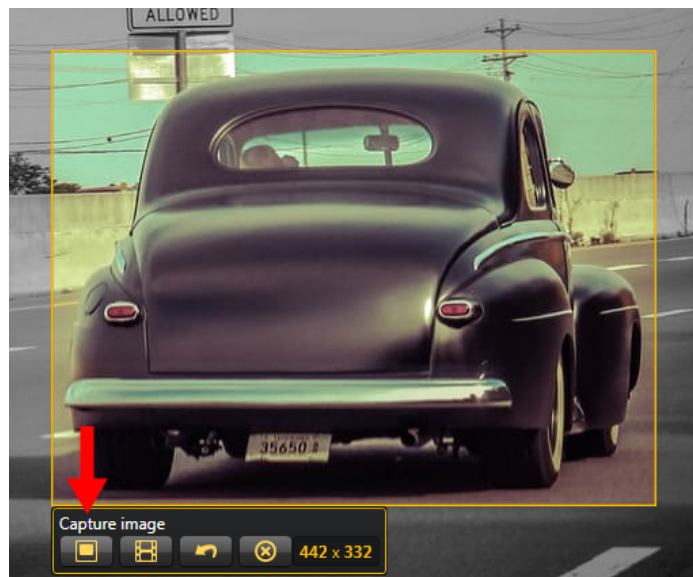

When in screen capture mode, you can capture a rectangular area or a whole window.

To capture an area:

1. Position the cursor over one corner of your desired rectangular area.
2. Left-click and drag the cursor to the opposite corner, then release.

3. In the confirmation menu, click **Capture image**.

To capture a window:

1. Position the cursor inside the window. A yellow border will indicate that it is ready for capture.

2. Tap left-click to capture.
3. In the confirmation menu, click **Capture image**.

Once you have captured an area or window, the image **Preview** window will open, where you can add arrows, annotations, frames, highlights, and save the capture.
